

HASNAIN KHAN

Aspiring Data Scientist | Data Analyst — Python, SQL, Machine Learning & BI

+91-9713146383 | hasnainkh3011@gmail.com | [linkedin.com/in/hasnainkhan3011](https://www.linkedin.com/in/hasnainkhan3011) | github.com/irlhasnain | Bhopal, Madhya Pradesh

PROFESSIONAL SUMMARY

- Aspiring data scientist with hands-on analyst experience across the full analytics-to-data-science pipeline: EDA, feature engineering, data-quality auditing, and building/evaluating ML models (classification, time-series forecasting, customer segmentation).
- Proficient in Python (Pandas, NumPy, Scikit-learn), SQL, and Power BI; delivered end-to-end ETL pipelines, forecasting models, and interactive dashboards.
- Maintained accuracy across 9,000+ records with zero compliance incidents; currently pursuing BCA (expected 2027) while deepening applied ML/statistics knowledge via the IBM Data Science Professional Certificate and DeepLearning.AI's ML Specialization.

TECHNICAL SKILLS

Programming & ML: Python (Pandas, NumPy, Scikit-learn), SQL, R; classification, regression, clustering (k-means, RFM segmentation), time-series forecasting (Prophet)

Data Science Workflow: EDA, data cleansing & feature engineering, statistical validation, ETL pipeline design, model evaluation (F1-score, MAE) BI & Visualization: Power BI, Tableau, Streamlit, Excel (Advanced — Pivot Tables, VLOOKUP)

Databases & Tools: MySQL, PostgreSQL, SQLite, Jupyter, Google Colab, Git/GitHub, SLA & task tracking, SOP adherence, confidentiality & compliance handling

Generative & Agentic AI: Applied prompt engineering, Retrieval-Augmented Generation (RAG), AI agent design & workflow automation, LLM-based tooling

WORK EXPERIENCE

AI Automation Intern | Seagull Venture Private Limited

Jun 2026 – Aug 2026 | On-site

- Automated structured data collection, reducing manual retrieval effort, by designing and running web scraping scripts to extract and organize data from target sources.
- Broadened technical exposure across AI-driven automation workflows and internal tooling by contributing to multiple exploratory automation tasks alongside core scraping work.
- Collaborated within a fast-paced startup environment, adapting quickly to shifting priorities and new tools with minimal onboarding.

Data Science Intern | Cognifyz Technologies

Mar 2026 – Apr 2026 | Remote

- Improved data quality across 4+ variables by labeling and encoding categorical restaurant attributes (cuisine type, price range, booking status) following structured feature-engineering guidelines; delivered accurate outputs across 3 comparative analyses with zero rework cycles by systematically reviewing data inconsistencies.

Data Analyst Intern | Ypsilon IT Solutions Pvt. Ltd.

Mar 2025 | Bhopal, On-site

- Ensured accuracy across 9,000+ employee records (audit-verified) by performing systematic quality checks using Pivot Tables, VLOOKUP, and conditional formatting to catch and correct inconsistencies.
- Protected sensitive workforce data with zero compliance incidents by adhering to confidentiality protocols while handling HR records containing personal employee information.
- Enabled faster, data-driven decisions — directly adopted by supervisor — by building and maintaining an interactive Power BI dashboard tracking attrition trends and departmental performance.

PROJECTS

Retail Sales Analytics — SQL-Driven ETL Pipeline with Prophet Forecasting [GitHub](#)

Mar 2026 – Jul 2026

Python · SQL · SQLite · Prophet · Streamlit · GitHub | Personal project, completed alongside internships | Live demo & code available on request

- Designed a normalized 4-table relational schema (customers, products, orders, order_items) and built an idempotent Python ETL pipeline to clean, deduplicate, and load 10,000+ transaction records into SQLite; built a SQL analytics layer for revenue aggregation, product ranking, and RFM-based customer segmentation.
- Reduced forecast error by 61% (MAE) using a Prophet model benchmarked against a moving-average baseline; deployed an interactive Streamlit dashboard with KPI cards, filterable revenue trends, and a 6-month forward forecast.

Customer Churn Prediction & Trader Sentiment Analysis

Jan 2026 – Feb 2026

Python · Scikit-learn | [GitHub](#)

- Cleaned raw datasets (handled missing values and inconsistent entries) and achieved a 91% F1-score on a classification task through careful data validation before model training.
- Completed a real-world data project for PrimeTrade.ai via Internshala, analyzing trader behavior data against provided scripts and instructions.

EDUCATION

Bachelor of Computer Application (BCA)

Sep 2024 – Expected Jun 2027

LNCT Group of College, Bhopal, Madhya Pradesh | CGPA: 8.4 / 10.0 | Coursework: Machine Learning, Data Structures, Statistics, DBMS, Data Mining

CERTIFICATIONS

- Certificate of Accomplishment — Data Analysis Using Python — Samatrix Consulting Pvt. Ltd.
- Deloitte Data Analyst Job Simulation — Forage (Data Analysis, Dashboard & Business Insights)
- AI Fluency: Framework & Foundations — Anthropic

Additional: AWS Job Simulation (Forage) · IBM SkillsBuild badges | Languages: English (Professional), Hindi (Native)
